

# *Caring for Someone with Alzheimer's Disease*

## How to Learn, Cope and Survive

Join us for this free program as Governor Martin J. Schreiber discusses his experience as a caregiver for his wife, Elaine, who has been diagnosed with Alzheimer's Disease. He will share his personal journey, including mistakes he's made and lessons he's learned, with the purpose of helping others who are traveling along this challenging road. The many insights he shares in this presentation are the basis for his soon to be published book titled "My Two Elaines."

We hope you will be able to join us for this honest and heartfelt program. Lite faire will be served.
