

North Shore Health Department Public Briefing

January 12th, 2021 as of 4:00 p.m.

COVID-19 VACCINE UPDATE

Wisconsin is currently in Phase 1A of vaccine prioritization. This includes frontline health care workers and long-term care facility residents and staff.

The North Shore Health Department is beginning to vaccinate Phase 1A this week. The Phase 1A vaccine clinics are by appointment only and are being made available to Phase 1A providers on a weekly basis.

There is a limited number of doses at this time. If you are a Phase 1A provider on our list you will be contacted individually.

We will provide regular updates about vaccination clinics on our website: www.nshealthdept.org. More information about Phase 1B and 1C will be shared when available. Thank you for your patience.

COVID-19 Vaccine Information: [Click Here](#)

Stay up-to-date on vaccination efforts in Milwaukee County – register for updates: <https://www.healthymke.com/register>. This website also helps to identify and link “unaffiliated” Phase 1A Health Care Personnel (HCP) in Milwaukee County with participating vaccinator organizations (Vaccinators). If you are an approved COVID-19 vaccinator, register to find Phase 1A organizations in need of vaccine. If you are a Phase 1A organization that needs to be vaccinated, you can register online to help make a connection with a vaccinator.

Got a negative COVID-19 test? Remember, it is cold & flu season, and other respiratory viruses are out there. Talk to your health care provider about additional testing. And please continue to stay home, wear a mask, physically distance, and wash your hands.

COVID-19 Cases to Date

North Shore (Bayside, Brown Deer, Fox Point, Glendale, River Hills, Shorewood & Whitefish Bay) - as of January 12th Changes from 1/11. This data is also available on our [website](#).

But your test comes back negative?

You could be infected with a different respiratory virus.

Flu (influenza), RSV (respiratory syncytial virus), and the common cold (rhinovirus) are a few of the many other respiratory viruses that spread throughout the year.

YOU STOP THE SPREAD
