

North Shore Health Department Public Briefing

January 6th, 2021 as of 4:00 p.m.

COVID-19 Vaccine Information on our [website](#) – check back for updates as Wisconsin continues to distribute the vaccine.

The State of Wisconsin does not currently have enough vaccine supply for everyone who wants to be vaccinated. Until vaccine supply increases, the State is following vaccine prioritization guidelines from the federal [Advisory Committee on Immunization Practices \(ACIP\)](#) and the [Wisconsin State Disaster Medical Advisory Committee \(SDMAC\)](#). The State is currently in Phase 1A of the vaccine prioritization guidelines, which includes frontline health care providers and skilled nursing facility staff and residents. As vaccine supply increases, other health care personnel and long-term care facility residents and staff will be offered COVID-19 vaccination.

The North Shore Health Department is aligning with Wisconsin DHS prioritization guidelines and is not currently vaccinating the general public. As additional vaccine supply becomes available, we will provide updates.

Have questions about the vaccine? The general public can email Wisconsin DHS with questions about the vaccine here: DHSCOVVIDVACCINEPUBLIC@wi.gov
