

April 17th, 2020 Update on COVID-19 (as of 4:00 pm)

The Centers for Disease Control and Prevention (CDC), the Wisconsin Department of Health Services (WI DHS) and the North Shore Health Department (NSHD), along with other local health departments are responding to an outbreak of respiratory disease caused by a novel coronavirus, COVID-19. For the most current information, visit the [CDC's website](#) or our [website](#).

We are currently monitoring 30 active cases in the North Shore, and we are also providing active monitoring for high-risk contacts of confirmed cases. We have triaged and processed over 786 suspect cases and/or contacts, and performed several large contact investigations, which involves notifying the contacts of their potential risk and educating them on self-quarantine guidelines. We are also managing several active cases in Milwaukee to assist the Milwaukee Health Department.

Governor Evers extends Wisconsin's Safer at Home order through Tuesday, May 26: Modifications have been made to the original Safer at Home order that will go into effect on April 24.

[Order Here](#) [Press Release Here](#) [FAQ Here](#)

The new order allows:

- Libraries and businesses, including craft stores, to do curbside pick-up and deliveries
- Golf courses to reopen
- External lawn care and construction to continue if it is done by one person

"Getting back to normal won't be like a light switch—we have to think of it like turning down a dial. And we all have to keep doing our part to so our families, our neighbors, and our communities stay safe." – **Governor Evers**

This is a rapidly evolving situation and we encourage you to frequently monitor the [DHS website for updates](#), as well as the [NSHD website](#). Additional information on COVID-19 can be found on the [CDC website](#).
