

April 24th, 2020 Update on COVID-19 (as of 5:00 pm)

The Centers for Disease Control and Prevention (CDC), the Wisconsin Department of Health Services (WI DHS) and the North Shore Health Department (NSHD), along with other local health departments are responding to an outbreak of respiratory disease caused by a novel coronavirus, COVID-19. For the most current information, visit the [CDC's website](#) or our [website](#).

We are currently monitoring 26 active cases in the North Shore, and we are also providing active monitoring for high-risk contacts of confirmed cases. We have triaged and processed over 962 suspect cases and/or contacts, and performed several large contact investigations, which involves notifying the contacts of their potential risk and educating them on self-quarantine guidelines. We are also managing several active cases in Milwaukee to assist the Milwaukee Health Department.

Thank you to our grocery stores and restaurants for continuing to serve the community during this time:

We appreciate the extra steps you are taking to keep all customers safe and healthy. The FDA released [guidance](#) on best practices that offers recommendations for stores and restaurants and an [infographic](#) that can be distributed to employees or posted in businesses.
