North Shore Health Department Public Briefing

August 31st, 2020 as of 4:00 p.m.

If you have been in close contact with someone that has tested positive for COVID-19, follow these steps from WI DHS **on what to do next.**

Not sure if it was close contact? Use this contact risk assessment flow chart to determine if your interaction is considered to be close contact.

September is Healthy Aging Month! This month was established to focus on how we can take care of our physical, mental, emotional, social and financial health to live a fulfilling life as we age.

The risk of COVID-19 increases with age, as severe illness and hospitalization is more likely to happen among older adults. It is important for people at increased risk of severe illness from COVID-19, and those who live with them, to protect themselves from getting COVID-19. If you know someone that is high-risk, respect their decisions when it comes to taking extra precautions to reduce their risk of getting sick.

More information on older adults and COVID-19
