

September 15th, 2020 as of 4:00 p.m.

As fall religious holidays approach, it is important to consider which methods of celebration or observation will keep you, your family, and your community safe. Here are some tips for reducing COVID-19 transmission risk for faith-based communities.

Lowest Risk: Virtual Services

Moderate Risk: Drive-up Services

Higher Risk: Outdoor Services – It is recommended to still practice physical distancing and mask wearing. Avoid singing, lining up in close proximity, or sharing items.

Highest Risk: Indoor Services – It is crucial to stay six feet apart and wear a mask. Avoid singing, lining up in close proximity, or sharing items. Encourage places to share their cleaning and sanitation protocols so you know they are cleaning high touch surfaces frequently.

Getting tested for COVID-19? When you get tested, they will ask for your address so public health workers will know which community you are living in for contact tracing and tracking purposes. Whichever location you plan to be at after you get your results is the address you should give when you get tested. It is important if you test positive for public health workers to know where you will be isolating at when we reach out to notify you. For example, college students should give their college address if they plan to stay at that location, but if they are traveling to a home address or other location that address should be reported. This will make the notification process smoother and allow for efficient tracking of cases.
