COVID-19
Community Testing Sites

Advocate Aurora Health is now offering expanded COVID-19 testing for their patients and community members who have COVID symptoms.

If you have ANY of these symptoms, you may need a test to see if you have COVID-19: cough, shortness of breath or difficulty breathing, fever, chills, body or muscle aches, headache, fatigue, sore throat, nausea, vomiting, diarrhea, or recent loss of taste or smell.

Register First

- If you have symptoms - go to this website aah.org/testing or call this number 1-877-819-5034 to find out if you need a test.

- It is important that you contact us to register before coming to an Advocate Aurora COVID-19 Community Testing site as everyone needs an appointment before they can be tested.

- Advocate Aurora Health welcomes anyone with symptoms, regardless of your ability to pay.

Where: Aurora Midtown Clinic
5818 W. Capital Drive, Milwaukee
By appointment only
